INNOVATION IN FOAM

# Foams for interlayers

# Sekisui Alveo Foams for interlayers

The handling, storage and transportation conditions for video or magnetic tapes, photographic or printing plates, typically call for maximum surface protection of the highly sensitive materials from which they are manufactured. Interlayers made of Alveolit foams offer safe, durable protection and have been successfully used in this application on a worldwide basis for more than 20 years.

### Main characteristics

Alveolit is a resilient, soft, elastic, physically crosslinked closed-cell polyolefin foam sheet (roll) with a premium quality surface. It is the ideal interlayer for audio/video tapes, photographic films, flexo printing plates, and many other products with highly sensitive surfaces.

### Optimal Sekisui Alveo foam products for interlayers

- > Alveolit TA 3002 white
- > Alveolit TA 1501 white

For further product information, please refer to the technical data sheets and product sales specifications available from your Sekisui Alveo area office or from the Sekisui Alveo headquarters.

Features	Benefits
> Premium surface quality	> No scratching of valuable packaging goods
> Physically crosslinked thermoplastic foams	> Non staining or migrations, chemically inert > Do not crumble or produce dust > Easy to convert
> Perfectly flat > Very low thickness tolerances	> Even and perfect contact between each packaging item
> Good long-term compressive and static creep performance	> No loose or shaky packaging units = safe transport
> Soft elastic	> Absorb shocks and vibrations
