

1. Products

Alveolit, Alveolen, Alveocel, Alveosoft, Alveobloc, Alveosport, Evalen

2. Producer / Supplier

Country:	 The Netherlands	 Germany
Adress:	Sekisui Alveo BV Montageweg 6 NL - 6045 JA Roermond	Sekisui Alveo BS GmbH Haystrasse 14-20 DE - 55566 Bad Sobernheim

3. Confirmation

Our closed cell Polyolefin-foams comply with:

- REACH Regulation (EC) No 1907/2006 (Refer to our actual statement on our website)
- Article 5, 4 Regulation (EU) 2025/40 (PPWR) regarding content of heavy metals as lead, cadmium, mercury and chromium (VI)
- Article 5, 5 Regulation (EU) 2025/40 (PPWR) regarding per- and polyfluoroalkyl substances (PFAS)
- According to Article 7 Regulation (EU) 2025/40 (PPWR), currently we do not use recycled plastics in our foams. Above mentioned foams can contain on request recycled material as ISCC PLUS grades (based on PCR plastic material)

An official methodology of recycled content will be defined by the European commission by 31.12.2026 and gets in force by 01.01.2030.

All above mentioned substances are not intentionally added to our products and as always traces of substances from external sources cannot be 100% excluded.

Recyclability:

Sekisui Alveo AG foams pass the recyclability test according to CHI assessment catalogue for EU-wide certification, including the check following ZSVR, EN 13430 and ISO 14021. They meet the requirements described in Article 6 of Regulation (EU) 2025/40 (please note: carbon black coloured, foil coated foams and flame retardant grades are excluded in this statement).

Please be informed that recyclability guidelines will finally be defined by the EU Commission in January 2028 and will be mandatory by January 2030. This declaration is based on the current state of knowledge and the interpretation of the existing PPWR Regulation (EU) 2025/40.

Furthermore, our foams are semi-finished products and are not directly covered by the Packaging Directive.

We recommend our customers to make a final assessment of the converted product in accordance with the above PPWR regulation (EU) 2025/40.

4. Author / Approval

on behalf of
Sekisui Alveo AG

Fabian Leuthard
(Application Development Manager)

Disclaimer:

All Information concerning technical/physical/chemical data and properties of our semi-finished foams are in accordance to the current state of the art and drawn on measurements, publications and our practical experience. All information in this document is correct in good faith. We have no control over the application of our foams and no legal responsibility for inappropriate usage is accepted. Control and approval of the final product in due consideration of the actual application as well as of conformity with European and national regulations are the responsibility of the foam applicant. Liability above the legal obligations is not accepted.

The present confirmation is valid until the amendment of the considered regulation, maximum 2 years starting from the validity date.
